

“Make Snacking Friendly and Fun Again !”

BNH - Keto Kandies are high fat, low carbohydrate, whole food “Kandies” that curb cravings. So they make Snacking Friendly and Fun again.

They are made with organic roasted **Peanut Butter** and sweetened with **Monk Fruit** instead of Stevia. So, in addition to not causing glucose and insulin spikes that can trigger an inflammatory response, they also don't have that bitter after taste we often experience with products sweetened with Stevia.

Best of all it contains organic **Collagen** from grass fed cows to support joint health, reducing aches and pains. Raw **Cocoa Butter** gives it the creamy texture and **Vanilla** and **Cinnamon** enhance its antioxidant and flavor profile.

Raw Cacao Nibs give it the antioxidant and neurotransmitter boost that helps support the cardiovascular and endocrine systems, leading to feelings of excitement and alertness and mood enhancement by boosting brain levels of serotonin.

Directions:

Keep Keto Kandies Refrigerated. They can be frozen and thawed as desired.
